PROJECTS

HTML/CSS — Landing Page
This project requires me to develop a web page of a business. This requires me to use HTML5 and CSS.

Bootstrap — Website of a club
This project requires me to develop the website of a club using Bootstrap with the php.

Laravel — E-commerce
This project requires me to develop a multi vendor website in which the seller and the consumer can directly deal with one another. This requires me to use bootstrap for the frontend and xampp for the backend and laravel as the framework.
